## EDUCATION

### Nandha Engineering College

2021 - 2023

M.C.A (master of computer application)

Percentage : 75%

## SKILLS

- HTML & CSS
- Javascript
- PHP
- Mysql
- API Integrations
- Ajax
- JQuery
- JSON
- React js
- Manage Domain & Hosting
- Website Optimization
- Manage Webmail
- Bootstrap
- Github

## PROFILE

I am an experienced web developer with a passion for creating attractive and interactive websites that meet customer needs and exceed expectations. With over 1.5 years of experience in web development, including managing domain and hosting servers, webmail, and client communications, I am actively seeking a challenging role where I can apply my expertise to enhance operational efficiency and drive business success.

## WORK EXPERIENCE

REAL ESTATE AGENT

### Cloud Dreams

April 2023 - October 2024

- Developed and maintained responsive websites using HTML, CSS, JavaScript, Bootstrap, PHP, Ajax, JQuery, Json and Reactjs
- Managed domain and hosting servers, ensuring seamless website uptime and performance
- Collaborated with clients to gather requirements and implement tailored web solutions
- Optimized website performance and SEO to enhance user experience and search rankings
- Provided troubleshooting and support for webmail systems and server-related issues

## TOOLS/SOFTWARE/HOSTING SERVER

- Visual Studio
- Sublime
- godaddy
- ovi panel
- cpanel
- hostinger

## PROJECTS

### DD GLOBAL

- Developed the frontend using HTML, CSS, JavaScript and Bootstrap to create an interactive and user-friendly interface.
- Built the backend using PHP and MySQLi to handle server-side logic and database interactions.

### ARB SCHOOL

- Developed the frontend using HTML, CSS, JavaScript and Bootstrap to create an interactive and user-friendly interface.
- Built the backend using PHP and MySQLi to handle server-side logic and database interactions.

### SOLALIGHTZ (E-COMMERCE SITE)

- Integrated Payment Gateway: Implemented a secure payment gateway (e.g., PayPal, Stripe, or any other) to facilitate seamless online transactions. This involved setting up the API, handling transaction data securely, and ensuring the payment process was smooth and reliable for users.
- Frontend Development: Used HTML, CSS, and JavaScript to design and build an interactive user interface, ensuring a responsive and user-friendly experience across devices. Employed jQuery to simplify DOM manipulation and improve interactivity, such as handling form submissions and dynamic content updates.
- AJAX Integration: Leveraged AJAX (Asynchronous JavaScript and XML) to create dynamic, real-time updates on the site without requiring page reloads. This was used for features such as adding items to the cart, updating product availability, or applying discount codes, improving the site's performance and user experience.
- Backend Development: Used PHP and MySQLi for server-side logic and to manage data interactions between the frontend and database. The backend handled tasks such as storing user information, processing orders, managing inventory, and validating payments.
- JSON for Data Exchange: Utilized JSON (JavaScript Object Notation) for exchanging data between the client and server, especially for dynamic content updates (like updating the shopping cart). This allowed for easy parsing and integration with both the frontend (JavaScript/jQuery) and backend (PHP).

## CONCLUSION

I am eager to leverage my skills and experience to contribute to a forward-thinking organization. With a strong foundation in web development and a proven track record of delivering high-quality projects, I am confident in my ability to drive business success and enhance operational efficiency. Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team.
